PRODUCT CHARACTERISTICS

The below information are not the Claims to be reported on the package of the final product, but they simply are information derived from the chemicals used in the impregnation of the wipe.

In order to identify the info to print on the package of the final product, please contact Citysan for support.

The product is intended for consumers who may need a practical multi-purpose open/close package of wet wipes

The product is included in detergents.

Fragrance: lemon and menthol.

The wipe is impregnated by a chemical base diluted with a percentage of water and enriched with Chlorhexidine gluconate 20% for increase effectiveness of antibacterial action. An effective formula able to clean the entire house, kitchen surfaces, bathroom, electronic devices. The formula is enriched with a lemon fragrance that perfectly links with the menthol. The wet wipe cleans, deterges and sanitize, without leaving haloes.

Neutral detergents: formulated with PH equal to 7-8. In the formula there are quaternary ammonium salts, isopropyl, alcohol and chlorhexidine.
